

### **Quick Deploy Weather Station Sharing Program 2005**

General: The NFFPC Fire Weather & Fire Danger Working Team has four FTS Quick Deploy Weather Stations available for use by Compact members. Members will be able to loan these weather stations for up to one year at a time in order to accommodate prescribed burns and wildfires, which may occur throughout the year.

Any member in need of a station is encouraged to contact those members with stations as to their availability. Respective members will work out the details of said weather station transfers. The receiving member will, upon receipt, notify the NFFPC Director and NECC about the new location and contact information (i.e. contact individual, e-mail address, and phone number). NFFPC will post this information on the Fire Weather and Fire Danger web page so that prospective users can locate and acquire a station.

The Fire Weather & Fire Danger Working Team will be responsible for the maintenance of the four weather stations. However, any damage to the weather stations may be the responsibility of the using member agency.
